

Dynamic FHIR IG Example

1. ASSUMPTIONS

- While creating example information, a Capability Statement will not be considered. Only Implementation guides will be considered.
- Only focus on Structure definition while generating information regardless of the conformance expectations.
- Generate data for the missing fields only for the primitive data types [listed](#)

Dummy default Values for primitive data types:

Datatype	Dummy Value
boolean	true
integer	100
string	sample
decimal	0.1
uri	?
url	http://hl7.org/fhir
canonical	http://hl7.org/fhir/ValueSet/all-languages
base64binary	8dAu
instant	?
date	current_date
dateTime	current_datetime
time	current_time
code	Get value from value set if the format is json, else send a warning
oid	urn:oid:1.0.1460592731711522882351903661480568434663364
id	R4jMeagKNFkCn5nOIkIkX3lZTG6wbC570
markdown	sample

unsignedInt	100
positiveInt	1000
uuid	Generated uuid
